CONTENTS

No. 1 JULY, 1938

M. Wight Taylor and Walter C. Russell. The stability of carotene in plant tissues. One figure 1

John R. Murlin and Henry A. Mattill. With the assistance of J. S. Carman and Elsie M. Austin. Digestibility and nutritional value of cereal proteins in the human subject 15

Emma E. Sumner, H. B. Pierce and J. R. Murlin. The egg-replacement value of several proteins in human nutrition 37

Edward B. Vedder and Charles Rosenberg. Concerning the toxicity of vitamin A 57

Paul György. Environmental temperature and 'rat acrodynia' 69

B. W. Fairbanks and H. H. Mitchell. The availability of calcium in spinach, in skim milk powder, and in calcium oxalate 79

Brian O'Brien and Kenneth Morgareidge. Radiographic demonstration of protection by vitamin D against metaphyseal decalcification in adult rats on high calcium—low phosphorus diet. Five figures 91

No. 2 AUGUST, 1938

Harry A. Waisman and C. A. Elvehjem. The effect of autoclaving on the nutritive value of edestin. Two figures 103

Ethelyn O. Greaves, Agnes Fay Morgan and Minnette K. Loveen. The effect of amino-acid supplements and of variations in temperature and duration of heating upon the biological value of heated casein. Two figures 115

Emma E. Sumner. The biological value of milk and egg protein in young and mature rats 129

Emma E. Sumner and J. R. Murlin. The biological value of milk and egg protein in human subjects 141

Harold I. Harvey, David T. Smith, Elbert L. Persons and Margaret V. Burns. The effect of various fractions of liver on experimental canine blacktongue. Four figures 153

S. Marcovitch and W. W. Stanley. A comparison of sodium fluoride in the drinking water with similar levels of cryolite in the diet on the fluorine content of the body. One figure 173

W. J. Dann and Y. Subbarow. Differentiation of the rat dermatitis factor and the chick dermatitis factor from nicotinic acid. Two figures 183

Paul J. Fouts, O. M. Helmer, S. Lepkovsky and T. H. Jukes. Production of microcytic hypochromic anemia in puppies on synthetic diet deficient in rat antidermatitis factor (vitamin B_6) 197

No. 3 SEPTEMBER, 1938

William J. Darby and Paul L. Day. The riboflavin content of meats. Three figures 209

Sergius Morgulis, Violet M. Wilder and S. H. Eppstein. Further studies on dietary factors associated with nutritional muscle dystrophy. Five figures 219

George Bachmann, John Haldi, Winfrey Wynn and Charles Ensor. The effect of a high glucose and a high fructose diet on the body weight and on the fat, glycogen, and nitrogen content of the liver and body of the albino rat. One figure 229

John Haldi, George Bachmann, Charles Ensor and Winfrey Wynn. Comparative effects of a high glucose and a high fructose diet on activity, body weight and various constituents of the liver and body of the albino rat exercising at will. Two figures 239

John R. Murlin, Edmund S. Nasset and M. Elizabeth Marsh. The egg-replacement value of the proteins of cereal breakfast foods, with a consideration of heat injury 249

O. M. Helmer and Paul J. Fouts. Multiple nature of the deficiency of blacktongue-producing diets as shown by studies on rats. One figure 271

E. L. R. Stokstad and P. D. V. Manning. The effect of riboflavin on the incidence of curled toe paralysis in chicks 279

Nellie Halliday. Fatty livers in vitamin B_6 deficient rats 285

William H. Adolph, Chun-Hsi Wang and Arthur H. Smith. The effect of roughage on the calcium balance in rats 291

E. J. Underwood. A comparison of ferrous and ferric iron in the nutrition of the rat 299

No. 4 OCTOBER, 1938

A. R. Kemmerer and G. S. Fraps. The digestibility of carotene by rats and chickens. One figure 309

Harold Blumberg, David H. Shelling and Deborah A. Jackson. The production of manganese rickets in rats 317

William Francis Drea. Spectrum analysis for trace elements in the ashes of human, goat and cow milk 325

R. F. Light, A. S. Schultz, L. Atkin and L. J. Cracas. The excretion of vitamin B_1 in the urine and feces 333

L. E. Booher and D. E. Williams. A study of the biophotometer as a means of measuring the vitamin A status of human adults 343

W. H. Sebrell, R. H. Onstott, H. F. Fraser and F. S. Daft. Nicotinic acid in the prevention of the blacktongue of dogs 355

P. W. Braestrup. The content of reduced ascorbic acid in blood plasma in infants, especially at birth and in the first days of life. One figure 363

Max Kriss and Arthur H. Smith. The change in total energy metabolism of rats receiving a diet deficient in inorganic constituents 375

Max Kriss and Arthur H. Smith. Oxidative changes induced by a mineral deficient diet 385

Kenneth Morgareidge and Brian O'Brien. Anomalies in the bio-assay of vitamin D milk 395

No. 5 NOVEMBER, 1938

Arthur D. Holmes, Francis Tripp and G. Howard Satterfield. The ascorbic acid content of chick blood. One figure 407

Roe E. Remington. Does fat in the diet affect the thyroid? 417

Leah Ascham, Mary Speirs and Dorothy Maddox. The availability of iron in various foods 425

Florence I. Scoular. A quantitative study, by means of spectrographic analysis, of copper in nutrition. Two figures 437

Paul H. Phillips and R. W. Engel. The histopathology of neuromalacia and 'curled toe' paralysis in the chick fed low riboflavin diets. Eight figures 451

D. W. Woolley, Julius Berger, W. H. Peterson and H. Steenbock. Toxicity of Aspergillus sydowi and its correction. Five figures 465

James D. Hardy, Ade T. Milhorat and Eugene F. DuBois. With the technical assistance of G. F. Soderstrom. The effect of exercise and chills on heat loss from the nude body. Three figures 477

J. D. Hardy and G. F. Soderstrom. Heat loss from the nude body and peripheral blood flow at temperatures of 22°C. to 35°C. Two figures 493

No. 6 DECEMBER, 1938

William Redman Brown, Arild Edsten Hansen, George Oswald Burr and Irvine McQuarrie. Effects of prolonged use of extremely low-fat diet on an adult human subject 511

Harry G. Day and Harold J. Stein. The effect upon hematopoiesis of variations in the dietary levels of calcium phosphorus, iron and vitamin D. Two figures 525

George Margolis, Lester H. Margolis and Susan Gower Smith. Cure of experimental canine blacktongue with optimal and minimal doses of nicotinic acid. Three figures 541

I. M. Rabinowitch. Theoretical and actual caloric requirements. One figure 549

I. M. Rabinowitch and A. F. Fowler. Variation of weight of dry feces in short period experiments with a low residue-neutral ash diet 565

E. J. Lease, Jane G. Lease, Janet Weber and H. Steenbock. Destruction of vitamin A by rancid fats 571

R. W. Engel and P. H. Phillips. The lack of nerve degeneration in uncomplicated vitamin B_1 deficiency in the chick and the rat 585

Howard L. Alt. The relation of growth and nutrition to the reticulocyte level in the young rat. Three figures 597

H. L. Campbell and H. C. Sherman. Nutritional effects of the addition of meat and green vegetable to a wheat-and-milk diet. Experiments with rats. One figure 603

Frederick F. Tisdall and T. G. H. Drake. With the technical assistance of Ruth Herbert. The utilization of calcium. One figure 613

L. A. Maynard. Secretary, American Institute of Nutrition. Mead Johnson & Company 'B-complex' award 621

INDEX

ACID, ascorbic. The content of, in blood plasma in infants, especially at birth and in the first days of life 363
Acid, nicotinic. Cure of experimental canine blacktongue with optimal and minimal doses of 541
'Acrodynia, rat.' Environmental temperature and 69
Activity, body weight and various constituents of the liver and body of the albino rat exercising at will. Comparative effects of a high glucose and a high fructose diet on 239
ADOLPH, WILLIAM H., CHUN-HSI WANG AND ARTHUR H. SMITH. The effect of roughage on the calcium balance in rats 291
ALT, HOWARD L. The relation of growth and nutrition to the reticulocyte level in the young rat 597
Amino acid supplements, the effect of, and of variations in temperature and duration of heating upon the biological value of heated casein 115
Anemia, microcytic hypochromic. Production of, in puppies on synthetic diet deficient in rat antidermatitis factor (vitamin B_6) 197
Anomalies in the bio-assay of vitamin D milk 395
ASCHAM, LEAH, MARY SPEIRS AND DOROTHY MADDOX. The availability of iron in various foods ... 425
Ascorbic acid content of chick blood .. 407
Aspergillus sydowi. Toxicity of, and its correction 465
Ashes of human, goat and cow milk. Spectrum analysis for trace elements in 325
ATKIN, L. See Light, R. F. 333
Autoclaving. The effect of, on the nutritive value of edestin 103
Availability of calcium in spinach, in skim milk powder and in calcium oxalate 79
Availability of iron in various foods 425

BACHMANN, GEORGE. See Haldi, John 239
BACHMANN, GEORGE, JOHN HALDI, WINFREY WYNN AND CHARLES ENSOR. The effect of a high glucose and a high fructose diet on the body weight and on the fat, glycogen and nitrogen content of the liver and body of the albino rat 229
BERGER, J. See Woolley, D. W. 465
Biological value of heated casein 115
Biological value of milk and egg protein in human subjects 141
Biological value of milk and egg protein in young and mature rats 129
Biophotometer. A study of, as a means of measuring the vitamin A status of human adults 343
Blacktongue. The effect of various fractions of liver on experimental canine 153
Blacktongue, experimental canine. Cure of, with optimal and minimal doses of nicotinic acid 541
Blacktongue, of dogs. Nicotinic acid in the prevention of 355
Blood, chick. The ascorbic acid content of 407
Blood flow, peripheral, at temperatures of 22°C. to 35°C. Heat loss from the nude body and 493
Blood plasma, in infants. The content of reduced ascorbic acid in, especially at birth and in the first days of life 363
BLUMBERG, HAROLD, DAVID H. SHELLING AND DEBORAH A. JACKSON. The production of manganese rickets in rats 317
BOOHER, L. E., AND D. E. WILLIAMS. A study of the biophotometer as a means of measuring the vitamin A status of human adults 343
BRABSTRUP, P. W. The content of reduced ascorbic acid in blood plasma in infants, especially at birth and in the first days of life 363
BROWN, WILLIAM R., A. E. HANSEN, G. O. BURR AND I. MCQUARRIE. Effects of prolonged use of extremely low fat diet on an adult human subject 511
BURNS, MARGARET V. See Harvey, Harold I. 153
BURR, G. O. See Brown, William R. 511

CALCIUM balance, in rats. The effect of roughage on 291
Calcium oxalate. The availability of calcium in spinach, in skim milk powder and in 79
Calcium, phosphorus, iron and vitamin D. The effect upon hematopoiesis of variations in the dietary levels of 525
Calcium, the utilisation of 613
CAMPBELL, H. L., AND H. C. SHERMAN. Nutritional effects of the addition of meat and green vegetable to a wheat-and-milk diet: experiments with rats 603
Caloric requirements, theoretical and actual 549
Carotene. Digestibility of, by rats and chickens 309
Carotene, in plant tissues. Stability of 1
Cereal breakfast foods. The egg-replacement value of the proteins of, with a consideration of heat injury 249
Cereal proteins, in the human subject. Digestibility and nutritional value of 15
Change in total energy metabolism of rats receiving a diet deficient in inorganic constituents 375

Chick, fed low riboflavin diets, the histopathology of neuromalacia and 'curled toe' paralysis in the 451
Chickens. The digestibility of carotene by rats and 309
Chicks. The effect of riboflavin on the incidence of curled toe paralysis in 279
Chills. Effect of exercise and, on heat loss from the nude body 477
Comparative effects of a high glucose and a high fructose diet on activity, body weight and various constituents of the liver and body of the albino rat exercising at will 239
Comparison of ferrous and ferric iron in the nutrition of the rat 299
Comparison of sodium fluoride in the drinking water with similar levels of cryolite in the diet on the fluorine content of the body 173
Concerning the toxicity of vitamin A 57
Content of reduced ascorbic acid in blood plasma in infants, especially at birth and in the first days of life 363
Copper, in nutrition. A quantitative study, by means of spectrographic analysis, of 437
CRACAS, L. J. See Light, R. F. 333
Cryolite, in the diet. A comparison of sodium fluoride in the drinking water with similar levels of, on the fluorine content of the body 173

DAFT, F. S. See Sebrell, W. H. 355
DANN, W. J., AND Y. SUBBAROW. Differentiation of the rat dermatitis factor and the chick dermatitis factor from nicotinic acid 183
DARBY, WILLIAM J., AND PAUL L. DAY. The riboflavin content of meats .. 209
DAY, HARRY G., AND H. J. STEIN. The effect upon hematopoiesis of variations in the dietary levels of calcium, phosphorus, iron and vitamin D 525
DAY, PAUL L. See Darby, William J. 209
Decalcification, metaphyseal, in adult rats on high calcium-low phosphorus diet. Radiographic demonstration of protection by vitamin D against 91
Deficiency, uncomplicated vitamin B_1 in the chick and rat. The lack of nerve degeneration in 585
Destruction of vitamin A by rancid fats 571
Diet, cryolite in the. A comparison of sodium fluoride in the drinking water with similar levels of, on the fluorine content of the body 173
Diets, deficient in inorganic constituents. Change in total energy metabolism of rats receiving 375
Diet, extremely low fat. Effects of prolonged use of, on an adult human subject 511
Diet, fat in the, does it affect the thyroid? 417
Diet, high calcium-low prosphorus. Radiographic demonstration of protection by vitamin D against metaphyseal decalcification in adult rats on 91
Diet, high glucose and a high fructose. Comparative effects of, on activity, body weight and various constituents of the liver and body of the albino rat exercising at will 239
Diet, high glucose and a high fructose. Effect of, on the body weight and on the fat, glycogen and nitrogen content of the liver and body of the albino rat 229
Diet, low residue-neutral ash. Variation of weight of dry feces in short period experiments with a 565
Diet, mineral deficient. Oxidative changes induced by 385
Diet, synthetic, deficient in rat antidermatitis factor (vitamin B_6). Production of microcytic hypochromic anemia in puppies on ... 197
Diet, wheat-and-milk. Nutritional effects of the addition of meat and green vegetable to, experiments with rats 603
Diets, blacktongue-producing. Multiple nature of the deficiency of, as shown by studies on rats 271
Diets, low riboflavin. The histopathology of neuromalacia and 'curled toe' paralysis in the chick fed 451
Differentiation of the rat dermatitis factor and the chick dermatitis factor from nicotinic acid 183
Digestibility and nutritional value of cereal proteins in the human subject 15
Digestibility of carotene by rats and chickens 309
Does fat in the diet affect the thyroid? 417
DRAKE, T. G. H. See Tisdall, Frederick F. 613
DRBA, WILLIAM FRANCIS. Spectrum analysis for trace elements in the ashes of human, goat and cow milk 325
DUBOIS, E. F. See Hardy, James D. 477
Dystrophy, nutritional muscle. Further studies on dietary factors associated with 219

EDESTIN. The effect of autoclaving on the nutritive value of 103
Effect of autoclaving on the nutritive value of edestin. The 103
Effect of exercise and chills on heat loss from the nude body 477
Effect of a high glucose and a high fructose diet on the body weight and on the fat, glycogen and nitrogen content of the liver and body of the albino rat 229
Effect of riboflavin on the incidence of curled toe paralysis in chicks. The 279
Effect of roughage on the calcium balance in rats. The 291
Effect of various fractions of liver on experimental canine blacktongue. The 153
Effect upon hematopoiesis of variations in the dietary levels of calcium, phosphorus, iron and vitamin D 525
Effects of prolonged use of extremely low-fat diet on an adult human subject 511
Egg-replacement value of the proteins of cereal breakfast foods, with a consideration of heat injury ... 349

Egg-replacement value of several proteins in human nutrition. The 37
ELVEHJEM, C. A. See Waisman, Harry A. 103
ENGEL, R. W. See Phillips, Paul H. 451
ENGEL, R. W., AND P. H. PHILLIPS. The lack of nerve degeneration in uncomplicated vitamin B_1 deficiency in the chick and the rat 585
ENSOR, CHARLES. See Bachmann, George 229
ENSOR, CHARLES. See Haldi, John 239
Environmental temperature and 'rat acrodynia' 69
EPPSTEIN, S. H. See Morgulis, Sergius 219
Excretion of vitamin B_1 in the urine and feces 333
Exercise, and chills on heat loss from the nude body. Effect of 477

FACTOR, chick dermatitis, and rat dermatitis factor. Differentiation of, from nicotinic acid 183
Factor, rat antidermatitis (vitamin B_6). Production of microcytic hypochromic anemia in puppies on synthetic diet deficient in 197
FAIRBANKS, B. W., AND H. H. MITCHELL. The availability of calcium in spinach, in skim milk powder and in calcium oxalate 79
Fat, glycogen and nitrogen content of the liver and body weight of the albino rat. Effect of a high glucose and a high fructose diet on the body weight and on the 229
Fat, in the diet. Does it affect the thyroid? 417
Fats, rancid. Destruction of vitamin A by 571
Feces, dry. Variation of weight of, in short period experiments with a low residue-neutral ash diet 565
Feces. The excretion of vitamin B_1 in the urine and 333
Fluoride, sodium, in the drinking water. A comparison with similar levels of cryolite in the diet on the fluorine content of the body 173
Fluorine content of the body. A comparison of sodium fluoride in the drinking water with similar levels of cryolite in the diet on the 173
Foods, the availability of iron in various 425
Foods, cereal breakfast, the egg-replacement value of the proteins of, with a consideration of heat injury 249
FOUTS, PAUL J. See Helmer, O. M. 271
FOUTS, PAUL J., O. M. HELMER, S. LEPKOVSKY AND T. H. JUKES. Production of microcytic hypochromic anemia in puppies on synthetic diet deficient in rat antidermatitis factor (vitamin B_6) 197
FOWLER, A. F. See Rabinowitch, I. M. 565
FRAPS, G. S. See Kemmerer, A. R. 309
FRASER, H. F. See Sebrell, W. H. 355
Fructose, high, diet. The effect of a high glucose and, on the body weight and on the fat, glycogen and nitrogen content of the liver and body of the albino rat 229
Further studies on dietary factors associated with nutritional muscle dystrophy 219

GLUCOSE, high, diet, and a high fructose diet, the effect of, on the body weight and on the fat, glycogen and nitrogen content of the liver and body of the albino rat 229
Glycogen, fat and nitrogen content of the liver and body weight of the albino rat. The effect of a high glucose and a high fructose diet on the 229
GREAVES, ETHELYN O., AGNES FAY MORGAN AND MINNETTE K. LOVEKEN. The effect of amino-acid supplements and of variations in temperature and duration of heating upon the biological value of heated casein 115
Growth, and nutrition. The relation of, to the reticulocyte level in the young rat 597
GYÖRGY, PAUL. Environmental temperature and 'rat acrodynia' 69

HALDI, JOHN. See Bachmann, George 229
HALDI, JOHN, GEORGE BACHMANN, CHARLES ENSOR AND WINFREY WYNN. Comparative effects of a high glucose and a high fructose diet on activity, body weight and various constituents of the liver and body of the albino rat exercising at will 239
HALLIDAY, NELLIE. Fatty livers in vitamin B_6 deficient rats 285
HANSEN, A. E. See Brown, William R. 511
HARDY, JAMES D., A. T. MILHORAT AND E. F. DUBOIS. Effect of exercise and chills on heat loss from the nude body 477
HARDY, J. D., AND G. F. SODERSTROM. Heat loss from the nude body and peripheral blood flow at temperatures of 22°C. to 35°C. 493
HARVEY, HAROLD I., DAVID T. SMITH, ELBERT L. PERSONS AND MARGARET V. BURNS. The effect of various fractions of liver on experimental canine blacktongue 153
Heat injury. The egg-replacement value of the proteins of cereal breakfast foods with a consideration of 249
Heat loss from the nude body and peripheral blood flow at temperatures of 22°C. to 35°C. 493
Heat loss, from the nude body. Effect of exercise and chills on 477
HELMER, O. M. See Fouts, Paul J. 197
HELMER, O. M., AND PAUL J. FOUTS. Multiple nature of the deficiency of blacktongue-producing diets as shown by studies on rats 271
Hematopoiesis. The effect upon, of variations in the dietary levels of calcium, phosphorus, iron and vitamin D 525
Histopathology of neuromalacia and 'curled toe' paralysis in the chick fed low riboflavin diets 451
HOLMES, A. D., F. TRIPP AND G. H. SATTERFIELD. The ascorbic acid content of chick blood 407

INFANTS. The content of reduced ascorbic acid in blood plasma in, especially at birth and in the first days of life 363
Iron. Availability of, in various foods 425
Iron, calcium, phosphorus and vitamin D. The effect upon hematopoiesis of variations in the dietary level of 525
Iron, ferrous and ferric. A comparison of, in the nutrition of the rat 299

JACKSON, DEBORAH A. See Blumberg, Harold 317
JUKES, T. H. See Fouts, Paul J. 197

KEMMERER, A. R. AND G. S. FRAPS. The digestibility of carotene by rats and chickens 509

Skim milk powder. The availability of calcium in spinach, in calcium oxalate, and in ... 79
SMITH, ARTHUR H. See Adolph, William H. ... 291
SMITH, ARTHUR H. See Kriss, Max 375, 385
SMITH, DAVID T. See Harvey, Harold I. ... 153
SMITH, S. G. See Margolis, George ... 541
SODERSTROM, G. F. See Hardy, J. D. 493
Specific dynamic action of food ... 549
Specific dynamic effect of diets, deficient in minerals ... 391
Spectrographic analysis. A quantitative study of copper in nutrition by means of ... 437
Spectrum analysis for trace elements in the ashes of human, goat and cow milk ... 325
SPIERS, MARY. See Ascham, Leah ... 425
Spinach, skim milk powder and calcium oxalate. The availability of calcium in ... 79
STANLEY, W. W. See Marcovitch, S. 173
STEENBOCK, H. See Lease, E. J. ... 571
STEENBOCK, H. See Woolley, D. W. 465
STEIN, H. J. See Day, Harry G. ... 525
STOKSTAD, E. L. R., AND P. D. V. MANNING. The effect of riboflavin on the incidence of curled toe paralysis in chicks ... 279
Study of the biophotometer as a means of measuring the vitamin A status of human adults ... 343
SUBBAROW, Y. See Dann, W. J. ... 183
SUMNER, EMMA E. The biological value of milk and egg protein in young and mature rats ... 129
SUMNER, EMMA E., H. B. PIERCE AND J. R. MURLIN. The egg-replacement value of several proteins in human nutrition ... 37
SUMNER, EMMA E., AND J. R. MURLIN. The biological value of milk and egg protein in human subjects ... 141

TAYLOR, M. WIGHT, AND WALTER C. RUSSELL. The stability of carotene in plant tissues ... 1
Temperature, environmental, and 'rat acrodynia' ... 69
Theoretical and actual caloric requirements ... 549
Thyroid. Does fat in the diet affect the 417
TISDALL, FREDERICK F., AND T. G. H. DRAKE. The utilization of calcium 513
Toxicity of Aspergillus sydowi and its correction ... 465
Trace elements. Spectrum analysis for, in the ashes of human, goat and cow milk ... 325
TRIPP, F. See Holmes, A. D. ... 407

UNDERWOOD, E. J. A comparison of ferrous and ferric iron in the nutrition of the rat 299
Urine, and feces. The excretion of vitamin B_1 in 333
Utilization of calcium 613

VARIATION of weight of dry feces in short period experiments with a low residue-neutral ash diet 565
VEDDER, EDWARD B., AND CHARLES ROSENBERG. Concerning the toxicity of vitamin A 57
Vegetable, green, nutritional effects of the addition of meat and, to a wheat-and-milk diet: experiments with rats 603
Vitamin A concerning the toxicity of .. 57
Vitamin A. Destruction of, by rancid fats 571
Vitamin A status of human adults. A study of the biophotometer as a means of measuring the 343
Vitamin B_1 deficiency, uncomplicated in the chick and rat. The lack of nerve degeneration in 585
Vitamin B_1. Excretion of, in the urine and feces 333
Vitamin B_6 deficient rats. Fatty livers in 285
Vitamin B_6. Production of microcytic hypochromic anemia in puppies on synthetic diet deficient in rat antidermatitis factor 197
Vitamin D. The effect upon hematopoiesis of variations in the dietary levels of calcium, phosphorus, iron and 525
Vitamin D milk, anomalies in the assay of 395
Vitamin D, radiographic demonstration of protection by, against metaphyseal decalcification in adult rats on high calcium-low phosphorus diet 91

WAISMAN, HARRY A., AND C. A. ELVEHJEM. The effect of autoclaving on the nutritive value of edestin 103
WANG, CHUN-HSI. See Adolph, William H. 291
Water, drinking, a comparison of sodium fluoride in, with similar levels of cryolite in the diet on the fluorine content of the body 173
WEBER, J. See Lease, E. J. 571
Weight, body, activity, and various constituents of the liver and body of the albino rat exercising at will, comparative effects of a high glucose and a high fructose diet on 239
WILDER, VIOLET M. See Morgulis, Sergius 219
WILLIAMS, D. E. See Booher, L. E. .. 343
WOOLLEY, D. W., J. BERGER, W. H. PETERSON AND H. STEENBOCK. Toxicity of Aspergillus sydowi and its correction 465
WYNN, WINFREY. See Bachmann, George 229
WYNN, WINFREY. See Haldi, John .. 239
